

Robotics

By: Josh Panos

What is Robotics

- Mechanical Engineering
- Electrical Engineering
- Computer Science
- Autonomous?
- Asimo?
- Boston Dynamics?

Autonomous

- Autonomous Robots
 - Are not as hard as it seems
- Low level complexity
 - Factory machinery
 - Assembly line arms
- High level complexity
 - Asimo
 - Boston Dynamics
 - These bots intake sensory information and make complex computational responses depending on live information

Honda Asimo

- Fully autonomous humanoid robot
- Abilities
 - Recognize faces
 - Map live environments
 - Run, Walk, Dance, and even Jump
 - Respond to voice commands
- What's to come?
 - Help the elderly and sick
 - Develop Sensors and feedback
 - Firefighters? Chemical spills?

Boston Dynamics

- A company focused on creating more mobile, agile and adaptable robots
- Atlas - The Agile Anthropomorphic Robot (Humanoid)
 - Has 28 Degrees of freedom
 - Runs off a Linux based system
 - Able to navigate outdoor and unstable environments on its own
- Potential Applications:
 - Firefighters & other Hazardous jobs
 - Driver, door man, etc

What I have been doing

- 4 Years of FIRST Robotics
 - A program which combines all disciplines of engineering into one place for students
- We build and code our bot on our own

Video of Robot

- https://photos.google.com/share/AF1QipPHZ9r0E9uB-MV0qXhSJ2DXTisYare2XUIa0foFvVSzrWHk4MUnqBfx8tumUQy3Bg/photo/AF1QipPFEBVgSO_Az2KW9fcKAjetW-rRJy7Rnb-v1DY?key=blpmRk9OYTI3aUxoUIFpV1FLQjVKRFo0VWcz0Ut3

What can you do

- Fedora Robotics Suite:
 - Provides easy access to software designed to work with robotics hardware.
 - We utilize Eclipse on our robotics team for programming and code deployment
 - Allows people to experiment with their own software in both real world and virtual environments
- Open Source software can be used to turn your small robot or project into a fully functional robot

How to start on your own

- Kits such as Lego Mindstorm
 - These kits allow you to play with your own software while providing the hardware to experiment with.
- Join groups or blogs online to work with others on interesting projects
- Don't be afraid to ask questions and ask other for help
- Jumping right in is not easy, but there are tons of people willing to help

The background is a solid pink color. In the top right corner, there is a decorative graphic consisting of several overlapping geometric shapes, including triangles and squares, in various shades of pink and magenta.

Thank you!
